

Subject: ANS Red Cross medal;
Mt. Sinai Hospital medal

Storer, Horatio R.
[Newport, RI]

1921

58 WASHINGTON STREET

NEWPORT, R. I.

Dear Mr. Wood,

27 March 1891

It is a long time since I have
heard from you - but not too late perhaps for me to
write you with the happiness of this Easter season.

I see by the Survey of 18th ult., p. 737,
that the Society is distributing, I judge gratuitously,
Mr. Fieschi's model of the Red Cross War Council
to Art Museums, etc. If this is so, will you please
send a copy to the Boston Medical
Library, & The Library, Boston. It will be gratefully
acknowledged by the authorities of the Library. Its ac-
ception of medical models has now become almost
unavoidable.

Now that I am in my 92nd year, I am
expecting to be called away from the researches that
have so long given to both of us so much pleasure and
any moment. Kindly give to Mr. Roe, Mr. Baldwin,
& to Mr. Huntington, my best regards - When you get in
any additional medicals, kindly let me know.

Sincerely yours

H. R. Storer

March 30th, 1921

Dr. Horatio R. Storer
58 Washington Street
Newport, R. I.

My dear Dr. Storer:

It is indeed a pleasure to hear from you. With regard to the Red Cross Medal about which you speak, we simply acted as agents for the Red Cross in selling these to our members. You should have received one of these circulars several months ago.

The Survey is wrong in stating that any of these medals were given to Art Museums, etc. Unfortunately, the subscription for them closed on March 15th and I doubt very much if any more can be obtained.

Wishing you the Compliments of the Easter season,
I beg to remain

Very truly yours,

Curator

22 April, 1921

Dear Mr. W.- In the Society Proceedings just received, I notice that you have that Vermorel etc. since Hospital models - Will you at your leisure, if you can have any kindly send me description or small sketch of this -

In a letter today from a correspondent at Washington, there is a suggestion that you may fit yourself useful. He was speaking of the difficulty of photographing bronze models - I am attempting one of the Pasteurs, but operator failed three times, & he himself tried, & then by hanging thin white tissue paper in front of the bronze, so that the light came through the open window, & filtered through upon the metals, he got a perfect result.

Sincerely yr.
H. R. Storer

Dr. H. R. Storer
58 Washington Street
Newport, R.I.

Dear Dr. Storer:

I am herewith sending you print
and galley proof description of Weinman's
Mount Sinai Hospital Medal. In the fall
we plan to issue a descriptive list of all
the medals made by Mr. Weinman, and this
will then be included in it.

For the most part we have been
successful in photographing bronze medals.
It is a matter of plates, colour filters,
exposure and, chiefly, lighting, either
with white paper, as you suggest, or with
mirrors.

Very truly yours,

Curator
